- Great attention to detail
- Solid understanding of the full web technology stack
- Passion for creating and delivering excellent web and user experiences
- Ability to innovate and partner with our design team to build quickly
- Git

Bonus Skills

- GitHub profile or link to open source work
- Having developed full-featured web-apps using a Javascript framework such as Angular or Foundation
- Great written communication and documentation abilities

Responsibilities

- Writing modular, scalable, testable Javascript, HTML and CS
- Working closely with designers and backend engineers
- Contributing through giving ideas for new features and identifying areas for improvements
- Prototyping product concepts
- Rapidly fixing bugs and solving problems

What we offer

- Flexible hours
- The ability to work part-time or full-time

About Us

NorthQ ApS is a Danish technology company, specialized in Internet of Things with a main focus on manufacturing and developing home automation and energy optimization solutions. Founded in 2007 by a small group of highly motivated and creative people, the company is the pioneer within retrofit meter reading solutions for electricity, gas and water meters.

Currently our solutions are used by major utilities like Dong Energy, SEAS-Nve, E.ON, Fortum and many others utilities, Telco's and OEMs. While developing the hardware and software of our products, we are guided by the belief that technology should be simple and robust. Moreover, it should be easy to install, easy to operate, without the need of much attention.
